InnoHSupport

2nd Cohort Innovative Suppliers in the Healthcare sector selected by InnoHSupport

1HEALTH GUT INN BALANCE
https://gut-in-balance.com/

1Health Gut Inn Balance has a clear vision: to empower hospitals by democratizing the production of Fecal Microbiota Transplantation (FMT) capsules. Our technology allows hospitals worldwide to manufacture safe, standardized FMT capsules locally improving access to microbiota-based therapies.

ADMIT THERAPEUTICS
https://admit-therapeutics.com/en/

ADmit Therapeutics, a Spain-based biotech company, is shattering the Alzheimer's paradigm with the MAP-AD Test: the first epigenetic, blood-based prognostic solution for Alzheimer's dementia. Using a disruptive combination of patented mitochondrial DNA biomarkers and artificial intelligence, this test predicts with exceptional accuracy which patients with mild cognitive impairment being evaluated for Alzheimer's disease will progress to dementia.

DIGIMEVO
https://digimevo.com/

Start-up founded in 2017 with an innovative Digital platform developing & providing the right evidence-based health educational content (Dtx) and digital resources at the right patient journey Points of Care. Customizable. HIS Integrable. Automatable. Committed to offering innovative tech solutions that are catalyst for better health outcomes and operating savings. Actually co-creating this purpose with more than 10 state of the art public hospitals in Spain and Latam.

HAPPY INNOVA
https://www.thesmartlollipop.com/

The Smart Lollipop is a lollipop-shaped medical device for diagnosing and monitoring diseases through saliva. Its goal is to replace traditional blood tests whenever the same diagnosis can be achieved from saliva.

HEALTHPRIV
https://www.healthpriv.com/

Healthpriv develops CYBER-BRICK, a hardware-based HSM powered by AI agents and blockchain, bringing a seamless Zero-Trust edge-security layer to medical devices—both new designs and retrofit installations. Co-created with hospital clinicians, IT teams, MD manufacturers and integrators, it mitigates cyber-risks and ensures compliance with new regulations. A plug-and-play module, it delivers autonomous protection, continuous blockchain-verified updates, and a secure backup network for critical medical systems. Backed by 8 international patents and multiple innovation awards, CYBER-BRICK is recognized as one of the most disruptive and investable solutions for medical device cybersecurity.

InnoHSupport

Funded by the European Union

2nd Cohort Innovative Suppliers in the Healthcare sector selected by InnoHSupport

MAGICVIEW
https://www.magicview.tv/

MagicView empowers seniors to live independently, safely, and with dignity. Our privacy-preserving digital health services enhance vitality and safety, helping elderly individuals to maintain Quality of Life while reducing societal care costs. Our sensor-based infrastructure continuously monitors Activities of Daily Living (ADL), translating real-world behavioural observations into AI-driven actionable guidance.

METAMEDICSVR
https://metamedicsvr.com/

MetaMedicsVR is a Spanish based health technology company creating immersive training programs that enhance soft and hard skills for healthcare professionals. Our web-based and VR-based courses help professionals develop empathy, communication, and leadership abilities, as well as practical clinical skills such as diagnosis.

MIGREVENTION
www.migrevention.com

Migrevention is transforming migraine and headache care with a medical device–grade digital platform that increases clinical efficiency 10x while empowering patients and clinicians through real-world data.

NEUROSALIENCE
https://www.neurosalience.com/

Neurosalience develops a tool for early detection of dementia from MRI scans. For saving time and money the product is capable of processing even low-resolution MRI data. The tool detects subjects with dementia, identifies brain regions mostly affected by ageing and outputs stage and type of dementia.

THRYVE HEALTH
https://www.thryve.health/

Thryve is the leading provider for accessing and understanding health data from wearables, trackers, and connected medical sensors. Thryve offers a unified API and health data analytics leveraging end users' 24/7 health data with the highest data privacy and security compliance standards.

VEINTREE
https://veintree.eu

VEINTREE® is a pioneering post biometric authentication company that transforms your hand into a post quantum cryptographic key—where contactless multispectral IR vein scans create dynamic, one time-use digital locks tied to you, without storing biometric data or relying on databases.
